

Intune Getting Started Guide

Welcome to your new Intune environment!

This deployment is self-contained to avoid conflicting with any existing devices.

Therefore whilst there are dynamic groups configured, everything is assigned to statically assigned groups for initial testing.

Add your test users to the Entra group:

Intune Deploy Pilot Users

Add your test machines to:

Intune Pilot Devices

Once you are happy with the configuration, you can either replace these assignments with the following groups, or simply nest the dynamic groups within the assigned ones:

Intune-Users (Dynamic group for everyone with an Intune license)

Autopilot-Devices-Dynamic (dynamic group for any Autopilot enrolled devices)
