

Windows Enrollment Guide

AUTOPILOT

Instructions

Fresh Machine

On the OOBE Screen (Language etc.)

Press Shift + F10

Type Powershell.exe -ExecutionPolicy Bypass

Type Install-Script -name Get-WindowsAutopilotInfo -Force

Type Set-ExecutionPolicy Unrestricted

Type Get-WindowsAutoPilotInfo -Online

It will prompt you to login and then confirm when it has completed.

On completion, power cycle the machine and you will be prompted to login to Autopilot

Re-Using a Machine

For a current machine run the scripts above from an Elevated PowerShell command.

When complete run c:\windows\system32\sysprep\sysprep.exe

Select the default and restart the machine
