# Android enrollment guide

Enrolling Android Device

If an existing device – Settings – Reset – Factory Reset

Click Start on device setup and connect to any wireless networks as required (steps will vary depending on device)

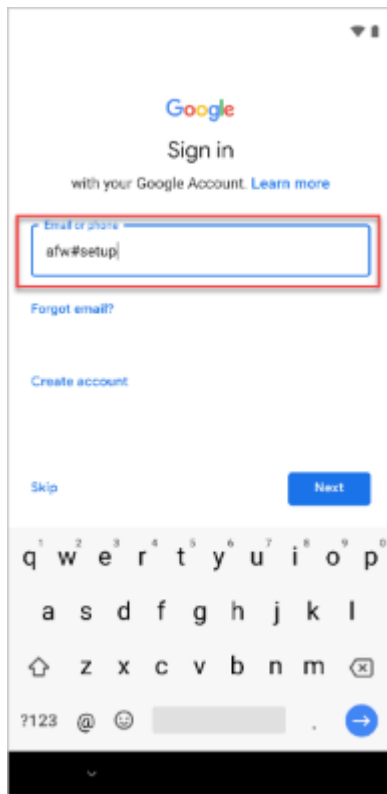

Click No Thanks or Don't Copy on the Copy apps and data screen

It may check and install any outstanding updates at this point

At the signin screen type afw#setup. On some newer devices, just tap the screen 7 times to reach the next stage

After the steps have completed, scan the QR code generated
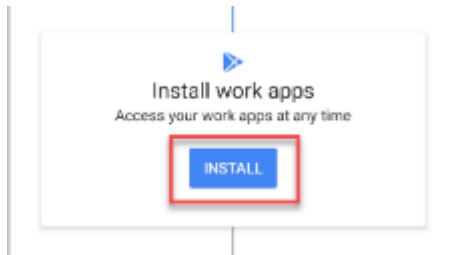

Click Accept & Continue

If a Chrome message appears, click Accept

Login with your email and password

Click Install

Click Next when finished

Click Set up on Register your device

Click Sign In on the Intune screen and login again

Click Register on the Help us keep your device secure screen

Click Next on the Setup screen

Click Done when finished

Your phone will now install any company required applications.
